## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Walker et al (U.S. Patent No. 5,884,270.)

As to claim 1, Walker et al teaches a system for exchanging data (see Abstract), comprising:

a communication system (see figure 1, and see column 6, lines 10-11);  
a first and a second party connected to the communication system (see figure 1, and see column 5, lines 5-17), wherein each party has personal data (see figure 2B, and see column 21, lines 32-46), and each party has a disclosure policy to control dissemination of its data

(see column 4, lines 17-66, where “disclosure policy” is read on “series of steps where the party authorizes release of information”, and see figure 6B); and

a secure intermediate party connected to the communication system (see figure 1, where “secure intermediate party” is depicted as “central controller 200”, and see column 10, lines 49-52), wherein the secure intermediate party exchanges data between the first and second parties in accordance with their respective disclosure policies (see Abstract, and see column 6, line 60 through column 7, line 6.)

As to claim 2, Walker et al teaches wherein the data exchanged (see Abstract) by the secure intermediate party (see figure 1, where “secure intermediate party” is depicted as “central controller 200”) is excluded from being transmitted to a third party in accordance with the disclosure policies of the first and second parties (see column 6, lines 32-39, and see column 8, lines 7-14.)

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of art with respect to methods and systems of data communications and data exchange systems in general:
